

Master in Trading Express Program Outline

The Master in Trading (MIT) Express program is an intensive one-week boot camp — Monday to Friday from 8 am to 4 pm — specially tailored for students with limited time, preparing them for trading multiple asset classes, such as futures, forex, stocks and options. Taught both from a fundamental and technical perspective, the MIT Express has an ongoing emphasis on risk management and trading psychology. Students are shown strategies in multiple timeframes such as day trading and swing trading and are encouraged to seek ongoing learning and mentoring at no extra cost.

Text: Master in Trading (MIT) Bible

The MIT Express also includes

Lifetime Community Membership — Join one of the biggest trader community in the world (200+ traders)

When we ask our students what they find so valuable about our courses, one of the first things they say is the community. At IOTAF we foster a highly collaborative and tight-knit community of traders that communicate on a regular basis through our online channels. The learning doesn't stop when you leave the IOTAF classroom.

Free Access for a limited time to the Agora Information system

Getting ahead of the news is the most important factor when trading the markets. Political developments, new government regulations, critical technical levels – these can all impact the price in a major way, and being among the first to find out can give you a huge advantage. We have designed a state of the art platform monitors the internet and scrapes all the most relevant information to present it as easy to read headlines and alerts.

Live Streams and Historical Recording of all classes

Every single class we do is recorded and live streamed. This way it does not matter if you are not able to attend a specific class you can watch the class on your mobile, at your home or watch the course at a later time.

Experience on a Live Trading Floor

What better way to learn than to shadow and/or trade alongside a team of highly experienced professional traders and financial analysts? We encourage our students to watch and ask questions while we work so that you can learn from our experience.

Free access to boot camps

As an MIT Express alumni, you can participate in our two-day boot camps that we organize on a regular basis on several topics (fx, futures, stocks, cryptocurrencies).
